

Dear FIS Global Hiring Team,

I'm excited to apply for the Go-To-Market Lead – Working Capital Solutions role. Building the operating rhythm behind a high-growth platform business, sharpening commercial messaging, and turning strategy into disciplined, measurable execution is exactly the work I enjoy most.

Over the past decade, I've worked across banking, consulting and fintech, building go-to-market frameworks and commercial strategy for B2B payments, financial services and enterprise software propositions across the UK, Europe and India. At EY, I built and ran a multi-scheme payments GTM operating framework across Visa, Mastercard and UK Finance, translating fragmented input from 5+ issuers and 10–15 PSPs, acquirers and merchants into clear campaigns, targets and cadence, and delivered client-ready sales collateral, pitch decks and messaging used to influence market-wide rollout and pipeline execution. I also built and activated EY's Fintech ecosystem through 15+ events and marketing campaigns, and supported cross-sell expansion across existing accounts at institutions including Barclays and JP Morgan Chase. With The Fintech Meetup, I've advised 10+ fintech and payments companies on capital raising, partnerships and growth strategy, reviewing pitch decks and go-to-market narratives to strengthen commercial positioning.

My direct delivery experience spans payments, treasury liquidity (including an Intraday Liquidity Management build for Deutsche Bank's Treasury front office) and embedded finance rather than trade or receivables finance specifically, but I bring a track record of ramping quickly on complex commercial domains and translating them into practical GTM plans, seller enablement and stakeholder alignment, exactly the discipline this role calls for.

What excites me most is the blend of strategic planning and hands-on execution: building campaigns, strengthening sales enablement and collateral, and creating a repeatable, measurable approach to seller engagement, corporate sales and pipeline growth. I bring strong financial modelling, CRM and sales enablement tooling familiarity, stakeholder management and storytelling skills to translate strategy into materials that sales teams and clients can act on.

I would welcome the opportunity to bring this experience in GTM execution, business development and payments/fintech domain expertise to FIS's Working Capital Solutions team, growing engagement across the Lending sales organisation, building segmented campaigns for Tier 1 and mid-sized bank clients, and activating partner-led channels with consulting firms.

Thank you for your consideration – I look forward to the opportunity to discuss further.

Warm regards,

Tanya Thourani
